KENYA ARMY SCHOOLS MANAGEMENT SYSTEM (KASMS)

ROLE REQUIREMENTS ASSESSMENT FORM

Reference: HQ KA letter Ref 1826/KACS/5/SYS dated 12 October 2026

Purpose

HQ KA has asked for KASMS to give secure, role-based access to selected offices. Before anything is built, we need to understand the problems your office faces and what KASMS must help you achieve. Your answers will be reviewed, and only requirements that solve a verified operational problem will be developed.

How to complete this form

- Describe your work and your problems, not the screens you would like. "I need a dashboard" is not a problem description.
- Questions marked * are required. Write "Not applicable" rather than leaving a required question blank.
- Give one concrete, recent example of the problem. Do not include sensitive operational details, personal data or copies of classified records.
- Requesting a capability or access level does not grant it. Every request is validated against the office's responsibilities and approved policy.
- If you have more than one unrelated problem, complete a separate form for each.
- Have the form checked by the validating officer named in Section A before returning it.
